

Joel Holmes

Personal profile

Full Stack Software Engineer with a strong desire to learn from, and contribute to, a highly collaborative and inclusive environment following an agile workflow with a culture of DevOps. I relish a challenge, in the next 3 years, I aim to advance my leadership/technical skills enabling me to grow into a Senior/Lead Software Engineer role.

Proficiencies

- C# - 2 years developing Microservice .NET Architecture for REG tech start up.
- TypeScript – Multiple web development projects ranging from Nodejs/MYSQL back ends and React/Angular front-end work.
- SQL – Familiar with different flavours of SQL such as Azure SQL server and MYSQL.
- Git – Proficient and comfortable with CLI tooling.
- AWS/Azure – Experience interacting with different cloud platforms as a developer hosting application using Docker/Kubernetes to host said solutions.
- Agile/DevOps – Accomplished in Agile ways of working and adept at working within a DevOps culture.
- Open to new technologies and languages don't feel bound to any programming language, I believe my value lies in my approach to solving problems not any specific syntax/toolset being used for that.

Employment History

- | | | |
|--|-----------------------------|------------------------------|
| Earnd | Software Engineer | February 2021 – Current |
| <ul style="list-style-type: none">• Financial wellbeing/Flexible pay application with a Typescript Nodejs backend stack and React front end. Exciting opportunity for me to learn from an amazing engineering team however, I am actively Searching for new role due to parent company's administration. | | |
| REG Technologies | Full stack Engineer | October 2019 – February 2021 |
| <ul style="list-style-type: none">• Developed REG Tech Microservices in .NET using auto moq to solve business problems with a TDD approach.• Experience working with third party data e.g. Companies house/Credit safe API Integration and Csv data parsed from FCA (monthly FTP refresh).• Demonstrated adaptability when due to job losses and a reduction in team size I pitched in with other areas such as infrastructure maintaining CI/CD Azure pipelines and our Kubernetes cluster.• Spent 80% of the role on the backend side of the stack due to team skillset, however had some limited exposure to and experience developing an Angular front end. | | |
| Fujitsu Services | Graduate Software Developer | Summer 2018 – October 2019 |
| <ul style="list-style-type: none">• Extensive customer exposure both on site and remote, within the context of critical project delivery for customer such as Post Office and HMRC.• Developed a rigorous understanding of Agile ways of working and Scrum ceremonies both through the role as a Developer and Scrum Master.• Took lead of a scrum team of Junior developer (Degree apprentices/Graduates) to aid the delivery of a change management solution for the Post Office built with React/MaterialUI/MYSQL/TypeScript. | | |

Certifications

SAFe certified Product Owner/Product Manager
I have been clear to a high government standard

Education

2:1 Bsc Software Engineering
